

WESTHEALTH
outpatient health care

New Breast Health Services

At WestHealth, we're expanding our breast health services to more fully meet your needs.

- Breast MRIs will soon be offered, in addition to the screening and diagnostic mammography; stereotactic and ultrasound breast biopsies; wire localizations already available.
- Mammography images will be read by Consulting Radiologists, Ltd., the same highly skilled radiologists who read images for the Piper Breast Center® at the Virginia Piper Cancer Institute® – Abbott Northwestern Hospital.
- A comprehensive Piper Breast Center will soon be opening at WestHealth, with access to breast health specialists including surgeons and genetic counselors.

To make your appointment, please visit our Breast Center, located on the first floor, West building or call 763-577-7133.
